MARP 2026-27
UNDERGRADUATE ASSESSMENT REGULATIONS INCLUDING REGULATIONS FOR INTEGRATED MASTERS AWARDS

UG 1 UNDERGRADUATE AND INTEGRATED MASTERS AWARDS

UG 1.1 The University currently offers the following undergraduate and Integrated Masters awards:

Undergraduate and Integrated Masters awards	FHEQ[1] Level of award	FTE period of study (normal)	Normal total credit value
MBChB	7	5 years	600 (minimum of 120 at FHEQ level 7)
Masters degree (Integrated): MArts (Hons); MChem (Hons); MEcon (Hons); MEng (Hons); MLang (Hons); MPhys (Hons); MPsych (Hons); MSci (Hons); MSocial Wk (Hons); MStat (Hons)	7	4 years	480 (minimum of 120 at FHEQ level 7)
Bachelors degree with honours, with integrated foundation year: BA (Hons); BSc (Hons)	6	4 years	480 credits (120 at RQF level 3, and a minimum of 90 at FHEQ level 6)
Bachelors degree with honours, with year abroad or placement year/year in industry: BA (Hons); BEng (Hons); BMus (Hons); BSc (Hons); LLB (Hons)	6	4 years	Minimum of 380 credits (minimum of 90 at FHEQ level 6)
Bachelors degree with honours: BA (Hons); BEng (Hons); BMus (Hons); BSc (Hons); LLB (Hons)	6	3 years	360[2] (minimum of 90 at FHEQ level 6)
Bachelors degree unclassified – Pass degree: BA; BEng; BMus; BSc; LLB	6	3 years	360 (minimum of 90 at FHEQ level 6)
Bachelors degree as top-up to Foundation degree: BA (Hons); BEng (Hons); BSc (Hons)	6	1 year	120 (minimum of 90 at FHEQ level 6)
Foundation Degree: FdA; FdSc; FdEng	5	2 years	240 (minimum of 90 at FHEQ level 5)
Diploma of Higher Education (DipHE)	5	2 years	240 (minimum of 90 at FHEQ level 5)
Certificate of Higher Education (CertHE)	4	1 year	120 (minimum of 90 at FHEQ level 4)
Higher Education Award	4,5,6,7	Open	20-90

[1] Framework for Higher Education Qualifications

[2] Note that for four-year study abroad programmes, the total number of credits will be between 390-420, depending on what was agreed when the programme was approved. Details are in UG 1.2.3 below.

UG 1.2 STUDY ABROAD DEGREE AWARDS[3]

UG 1.2.1 Unless otherwise stated in course documentation, students are eligible for the award of 'Study Abroad' degree titles having completed at least one full term of study abroad with a partner institution. Study for this may take place in person or online (including online study undertaken outside of the country of the partner institution).

UG 1.2.2 Where a student completes less than one full term of study abroad, the options will be discussed on a case-by-case basis by the department with the student. Options may include a variation on the assessment for the student's programme of study in order to demonstrate the learning achieved commensurate with the Study Abroad element of their degree title. Any such variation must be approved by the faculty Associate Dean. In order to be awarded the credits from study abroad the assessment devised by the department and approved by an Associate Dean must be broadly comparable and proportionate and should demonstrate learning outcomes relevant to the study abroad experience.

UG 1.2.3 **For students entering programmes from the 2023-24 academic year onwards:** all named Study Abroad programmes shall be four years in length (or five years, where the programme is an Integrated Masters programme with Study Abroad, commencing from 2026-27 onwards), with exemptions detailed below. Students on Study Abroad programmes shall normally study abroad in their third year of study (although this may vary, especially for Integrated Masters with Study Abroad). During the year abroad, students will take on a full timetable of study (equivalent to 120 credits), of which a set number of credits in a relevant subject area will be 'brought back' and be included in the final degree classification calculation. The number of credits brought back will be either 30, 45 or 60 credits. The number of credits to be brought back for each programme will be included in programme-specific published material. Students must agree with their study abroad advisor in writing, in advance of departure which credits are designated as being brought back. Any remaining credits not allocated to be brought back can be freely chosen in any subject area. Students are advised to designate at least one back-up module per term/semester in case their agreed options are not running at the partner, or are otherwise not available. Failure to undertake study in relevant subject areas, or any deviation from the study plan as agreed with the study abroad advisor, may result in students being removed from the study abroad degree, and returned to the parent programme.[4]

UG 1.2.4 ***This clause only applies to students on the previous four-year Integrated Masters with Study Abroad variant, who began their studies in the 2025/26 academic year or before.***
Students on Integrated Masters programmes with a study abroad component bring back all 120 credits from their study abroad period, and these credits must be agreed in writing, in advance of departure with the Study Abroad advisor.

---

[3] Programmes delivered by the School of Global Affairs (SGA), including the International Placement Year degree are subject to separate regulations. Details can be found in the published programme information supplied by SGA.

[4] Note that these regulations are intended to apply to programmes with a study abroad component offered at the Bailrigg campus only. Programmes at Lancaster's Regional and International Teaching Partnerships (RTPs and ITPs respectively) are subject to different regulations, as detailed when these programmes were approved.

UG 1.2.5 Only the departments of Accounting & Finance and Economics offer the option to study abroad in the Michaelmas term of the 3rd year. Any new programmes proposed as exemptions to the four-year model must be approved by the body with delegated authority from Senate.

UG 2 STRUCTURE OF BACHELORS DEGREE PROGRAMMES AND INTEGRATED MASTERS DEGREE PROGRAMMES

UG 2.1 Bachelors degrees comprise learning across FHEQ Levels 4, 5, and 6, normally with 120 credits of assessment at each level. Bachelors degree programmes which provide a top-up to Foundation Degrees comprise learning at Level 6 with 120 credits of assessment. Integrated Masters degrees comprise learning across Levels 4, 5, 6 and 7, normally with 120 credits of assessment at each level.

UG 2.2 Level 4 learning is collectively referred to as Year 1 and is qualificatory only, i.e. successful completion is required for progression to further study but obtained credit does not contribute to final classification of awards. Learning at Levels 5, 6 and, as appropriate, 7 form the classifiable components of a programme of study and comprise all credit upon which the final classification of an award is determined. In places in the regulations below, specific levels and/or years will be referred to as appropriate.

UG 2.3 Undergraduate degree programmes and assessment arrangements for the classifiable components of a degree are based on the principle that the load on students in terms of total teaching, learning and assessment activities should be equally distributed between each academic session i.e. a single academic year should normally comprise 120 credits.

UG 2.4 Exceptionally, if differential assessment weightings are in effect between modules studied and assessed across different levels or years in a programme, information on these arrangements must be clearly published in advance.

UG 2.5 Where course rules allow, any undergraduate student not already enrolled on a Languages degree (either as a single or joint Honours), may take a maximum of 20 credits of a 'discovery language' in their Final Year of study. This 'discovery language' module may be mapped to Level 4, 5 or 6 (please see Appendix 7 for more detail).

UG 3 CRITERIA FOR AWARD

UG 3.1 The pass mark for undergraduate honours degrees and other undergraduate awards shall be 9.0, unless otherwise stipulated in the Appendix 5 of the Undergraduate Assessment Regulations, with credit for a module being awarded when the overall mark for the module is 9.0 or greater or the module has been compensated.

UG 3.2 For Integrated Masters students, credit for modules is awarded as follows (or the module has been compensated):

a) for Level 5 and Level 6 modules when the overall mark for the module is 9.0 or greater;

b) for Level 7 modules when the overall mark for the module is 12.0 (50%) or greater.

UG 3.3 In order to qualify for the overall award, students must have attained in full the minimum credit requirement for the programme (including credit for failed modules which have been compensated) and passed all contributory modules.

UG 3.4 A Pass Degree may be awarded with an aggregation score of 8.1 or above.

UG 4 PROGRESSION

UG 4.1 GENERAL

UG 4.1.1 Each programme will have progression requirements detailed and approved through the programmes approval process. Examining bodies will determine whether a student has successfully met the progression requirements for a programme giving full countenance to exceptional circumstances as reported from the Exceptional Circumstances Committee**,** reassessment and compensation opportunities as detailed below.

UG 4.1.2 In order to qualify to progress to the next stage of the programme, students must have attained in full the minimum credit requirement for the stage completed (including credit for failed modules which have been compensated).

UG 4.1.3 Additional progression requirements for programmes with professional accreditation are detailed in Appendix 5 of the Undergraduate Assessment Regulations.

UG 4.2 PROGRESSION FROM YEAR 1 TO YEAR 2[5]

UG 4.2.1 In order to progress from the first year of studies to the classifiable components of a degree, an overall aggregation score of 9.0 is required. An aggregation score of 9.0 is also required in each individual module or combined assessment unit (e.g., where five modules worth eight credits each are combined into a 40-credit component). There is no further requirement for students to attain a particular score in the individual elements of each module, so long as an overall aggregation score of 9.0 is obtained in the assessment unit or module as a whole.

Note firstly that compensation may be applied to modules in the first year of study, as set out below in UG 7; and secondly that Professional, Statutory and Regulatory Body (PSRB) rules may apply for some awards, as set out in Appendix 5.

UG 4.2.2 Students who initially fail one or more subjects in their first year will be offered an opportunity to resit the subjects failed. Students who wish to change their programme of study following initial failure may opt out of this resit opportunity and apply directly for a restart year on an alternative programme for which the eligibility criteria have been met. Students retain the right to undertake the resits should they so wish. All other students who choose not to participate in this resit opportunity will be deemed to have withdrawn from the University.

UG 4.2.3 Exceptionally, an examination board may offer a student the opportunity to repeat the year on the same programme of study without having to take the associated resits. Students retain the right to undertake resits should they so wish. The department must

[5] For queries relating to progression from Year 1 to Year 2 prior to the 2026-27 academic year, please contact the Academic Quality, Standards & Conduct team via the MARP Enquiries inbox (marp-enquiries@lancaster.ac.uk) for previous iterations of MARP.

work closely with the student to advise them on their available options. Normally students should only be offered the opportunity to repeat the year without taking resits where they have failed the vast majority of the year. Students undertaking a repeat year of study shall be subject to the conditions laid out below in UG 4.2.6, including losing all credit, marks and grades obtained in the year to be repeated.

UG 4.2.4 After taking resits as required, a student who passes all subjects with the required aggregation score qualifies to progress to the second year of their degree. Otherwise, in line with the rules on compensation in UG 7, failure of up to 20 credits may be compensated where the aggregation score is at least 7.0 in the module(s) failed. Failures below 7.0 cannot normally be compensated.

UG 4.2.5 Students who have not passed all subjects, and whose failures have not been compensated after resit, will be offered, immediately following the examination board at which the student was considered, the choice of:

a) one (and only one) further resit opportunity as an external candidate; or

b) a repeat year.

UG 4.2.6 Students opting for a repeat or restart year will:

a) have full-time student status;

b) lose all credit, marks and grades gained in the original Year 1;

c) have a compulsory meeting with their department, arranged by the department to discuss any support needs the student may have, and to be signposted to any other relevant services;

d) be placed on academic probation, with especially close monitoring of academic progress by the major department;

e) otherwise be treated the same as any other Year 1 student;

f) have one resit opportunity if necessary;

g) not be allowed any further resit opportunity as an external candidate or another repeat year, except under exceptional circumstances where approved by the Year 1 Resit Board.

UG 4.2.7 The award of Certificate of Higher Education shall be made to students who have achieved 120 credits at Level 4 or above, with no more than 20 credits compensated in line with UG 7, and who have ended their studies at the University without qualifying for either a degree or a Diploma of Higher Education.

UG 4.2.8a For students on named Four-Year Study Abroad variants (with the exception of Integrated Masters Study Abroad programmes from 2025-26, which are dealt with below in UG 4.2.8d), progression from Year 1 to Year 2 shall follow the standard progression rules as laid out above in UG 4.2.1-4.2.7, unless higher requirements are mandated by a PSRB. Students on Four-Year Study Abroad degrees are advised that Study Abroad Partner Institutions will make admissions decisions based on Year 1 study which might be above Lancaster University's progression threshold.

Please note that subsequent years' progression requirements for all students on Four Year Study Abroad programmes are detailed below in UG 4.3.12 – 4.3.13.

UG 4.2.8b **This clause applies to all students entering on Three-Year Study Abroad programmes in Economics and Accounting & Finance, with study abroad in either second year or the Michaelmas term of Final Year:** to progress to Year 2 of the Study Abroad programme, students must achieve a pass, at the first attempt, as defined above. Additionally they should achieve higher overall grades in all units. The exact requirement is for each department to determine but it should normally be in the region of an aggregation score of at least 15.0 in major components plus at least 12.0 in minor components.

UG 4.2.8c **This clause applies to all students on degree programmes with significant levels of industrial engagement:** progression to Year 2 of the degree follows the standard rules as laid out above in UG 4.2.1-4.2.7, unless higher requirements are mandated by a PSRB.

UG 4.2.8d **This clause applies to students on Integrated Masters programmes with a Study Abroad (IMSA) year[6] for the academic year 2025-26 onwards:** for progression to Year 2 of an IMSA degree, students must achieve an overall aggregation score of 12.0. Where this aggregation score is not achieved but a student still qualifies to progress under the parent Integrated Masters programme, students will revert to the parent programme.

UG 4.2.9 Students who were not admitted to the following degree programmes will have no entitlement to transfer into these programmes at the end of Year 1:

BSc Hons Accounting and Finance

BSc Hons Accounting, Finance and Mathematics

BSc Hons Accounting and Management

BSc Hons Economics and Finance

BSc Hons Finance

BSc Hons Finance and Management

BSc Hons Management (*previously* BBA Management)

BSc Hons Management and Information Technology (*previously* BBA Management and Information Technology)

BSc Hons Mathematics with Finance

BSc Hons Mathematics with Finance (Industry)

MSci Hons Financial Mathematics

BSc Hons Management and Information Technology

BA Hons Advertising and Marketing

All Study Abroad (including North America/Australasia) degrees

[6] With the exception of the MLang: Year 1 progression for this award follows UG 4.2.1 above.

UG 4.3 PROGRESSION WITHIN THE CLASSIFIABLE COMPONENT OF A DEGREE

UG 4.3.1 To progress to the **Final Year of a Bachelors with honours degree** (or part-time equivalent) all students must achieve, following all opportunities for reassessment, an overall aggregation score of 9.0 with no more than 20 credits compensated.

UG 4.3.2 Exceptionally, an examination board may offer a student the opportunity to repeat any non-Final Year on the same programme of study. This can be offered with or without having to first undertake the associated resits or submit an academic appeal. This option is only available to examination boards where the student has not previously attempted any repeat year. Students retain the right to undertake the resits for the failed year or submit an academic appeal should they so wish. The department must work closely with the student to advise them on their available options. Students undertaking a repeat year of study will lose all credit, marks and grades obtained in the year to be repeated. Departments may also advise on additional expectations around engagement and academic progress for the student.

UG 4.3.3 Repeat years under UG 4.3.2 are not available to students in Year 3 of an Integrated Masters degree programme.

UG 4.3.4 The award of Diploma of Higher Education shall be made to students who have achieved 240 credits (120 of which are from Level 5 or above), with no more than 40 credits in total compensated in line with UG 7, and who have ended their studies at the University without qualifying for a degree.

Regulations UG 4.3.5 – 4.3.8, for progression within the classifiable component of an Integrated Masters degree: ***apply to students who entered the programme prior to academic year 2021-22***

UG 4.3.5 To progress from **Year 2 to Year 3 on Integrated Masters degrees** the regulations are the same as for a Bachelors Honours degree. All students who meet these progression requirements will remain on the Integrated Masters degree during Year 3.

UG 4.3.6 Progression from **Year 3 to Year 4 on Integrated Masters degrees** should be automatic for students meeting the criteria, at the first sitting, for a 2(i) Bachelors Honours degree.

UG 4.3.7 Progression from **Year 3 to Year 4 on Integrated Masters degrees** for those students who have <u>not</u> met the standard criteria for a 2(i) Bachelors Honours degree will be permitted provided they have met other criteria defined under programme-specific regulations which have been previously approved and published as part of the University's programme approval procedures.

UG 4.3.8 Any student who does not meet the requirement for progression from Year 3 to Year 4, or who does not wish to continue to Year 4, will be considered for classification for a Bachelors Honours degree.

Regulations UG 4.3.9 – 4.3.11 for progression within for progression within the classifiable component of an Integrated Masters degree: *for students who entered the programme from 2021-22 onwards*

UG 4.3.9 **Main Progression Rule (Years 2 and 3)**: To progress on the Integrated Masters degree students must achieve a Year 2 average of 12.0 or above and a Year 3 average of 15.0 or above.

UG 4.3.10 **Alternative Progression Rule (Year 3)**: If a student fails to progress to Year 4 under the Main Progression Rule, they may progress to Year 4 if they achieve a 2(i) overall in the classifiable components of their degree, or if they meet the borderline criteria for a 2(i) as laid out in UG 5.6 (a).

UG 4.3.11 Any student who does not meet the requirement for progression from Year 3 to Year 4, or who does not wish to continue to Year 4, will be considered for classification for a Bachelors Honours degree.

Regulations UG 4.3.12 – 13 for progression within the classifiable component of a Degree on Four-Year Study Abroad programmes: *for students who entered the programme from 2023-24 onwards*

UG 4.3.12 **Progression from Year 2 to Year 3:** To progress on to the Year 3 of a Study Abroad programme, students must achieve a pass, at the first attempt, as defined above. Additionally they should achieve higher overall grades in all units. The exact requirement is for each department to determine but it should normally be in the region of an overall aggregation score of at least 15.0. Higher requirements (e.g., higher pass marks in specific modules) may be set for individual programmes, subject to departmental and faculty approval, and will be clearly outlined in published material available to students, both prior to the commencement of and during their studies.

UG 4.3.13 **Integrated Masters with Study abroad**: students on Integrated Masters programmes with a Study Abroad year shall be subject to the higher Study Abroad progression requirement (as set out in UG 4.3.12 above), which takes precedence over the IM progression rules set out in UG 4.3.9 – 4.3.10.

UG 5 CLASSIFICATION OF AWARDS

UG 5.1 Each programme will have final award criteria detailed and approved through the programmes approval process. Examining bodies will determine whether a student has successfully met the final award criteria giving full countenance to exceptional circumstances as reported from the Exceptional Circumstances Committee, reassessment and compensation opportunities as detailed below.

UG 5.2 In order to qualify for the overall award, students must have attained in full the minimum credit requirement for the programme (including credit for failed modules which have been compensated), and achieved an overall aggregation score of at least 9.0 unless otherwise stipulated in Appendix 5.

UG 5.3 Where awards are classified the overall mean for the programme should be computed from the module aggregation scores in proportion with the approved credit weightings for each module. This overall mean score should be expressed to one decimal place and

be used to determine the class of degree to be awarded in accordance with the class boundaries as defined below.

UG 5.4 There will be four classes of honours: first, upper second, lower second and third. A student who is not placed in one of the four classes will not be eligible for the award of an honours degree. This will not prevent the award of an unclassified honours degree within the terms of the regulations.

UG 5.5 Where the mean overall aggregation score falls within one of the following ranges, the examining bodies will recommend the award stated:

17.5 to 24.0	first class honours
14.5 to 17.4	upper second class honours
11.5 to 14.4	lower second class honours
9.0 to 11.4	third class honours
0.0 to 8.9	fail

UG 5.6 Where the mean overall aggregation score falls within one of the 'borderline' ranges defined below:

17.1 to 17.4	either first or upper second class honours
14.1 to 14.4	either upper or lower second class honours
11.1 to 11.4	either lower second or third class honours
8.1 to 8.9	either pass degree or fail

the examining bodies will apply the following rubric for deciding the degree class to be recommended:

a) For all students, where a student falls into a borderline then the higher award should be given where:

   (i) half or more of the credits of the classifiable years of their degree are in the higher class; or

   (ii) the Final Year average is in the higher class.

b) Borderline students not meeting either of the criteria described in (a) above would normally be awarded the lower class of degree unless (c) applies.

c) That for all students, borderline or not, Examination Boards should continue to make a special case to the Committee of Senate via the Classification and Assessment Review Board for any student where the class of degree recommended by the Board deviates from that derived from a strict application of the regulations. Such cases would be based around circumstances pertaining to individual students where these circumstances have not already been taken into account.

UG 5.7 Integrated Masters students who withdraw during the Level 7 Final Year of their programmes, or whose achievement at the end of that year does not qualify them to be awarded an Integrated Masters degree, may be awarded a classified Bachelors degree (BA, BSc, BEng, etc.) with Honours, in accordance with the regulations for the corresponding Bachelors award.

UG 5.8 Academic judgement does not constitute grounds for appeal; however, students who wish to challenge the process may do so under the procedures for Academic Appeals.

UG 5.9 In addition to standard University classification requirements, certain degrees which carry professional accreditation have additional requirements. These are detailed in Appendix 5 of the Undergraduate Assessment Regulations.

UG 6 REASSESSMENT

UG 6.1 YEAR 1 REASSESSMENT

UG 6.1.1 A student who fails a Level 4 module will be required to undertake a reassessment for that module in order to be considered for progression to the classifiable years of a degree. If the module aggregation score after reassessment is an improvement on the original score, the reassessment score will count; otherwise the original aggregation score will stand. The reassessment score will not be subject to a cap. Compensation will not be considered until after reassessment.

UG 6.2 REASSESSMENT IN NON-FINAL CLASSIFIABLE CREDIT YEARS

UG 6.2.1 A student who fails a module will be required to undertake a reassessment for that module in order to be considered for progression to the next stage. If the module aggregation score after reassessment is an improvement on the original score, the reassessment score will count subject to a cap of 9.0 aggregation points; otherwise the original aggregation score will stand. The resulting aggregation score will count towards the overall average. Compensation will not be considered until after reassessment.

UG 6.3 FINAL-YEAR REASSESSMENT

UG 6.3.1 A student who fails a module with a score below the compensable range for that programme will be required to undertake a reassessment for that module, in order to be considered for the award of a degree. In addition, if more credits are failed than can be compensated, or the overall aggregation score is below the passing score for that degree programme, a student must resit either all failed modules or sufficient failed modules to ensure that compensation may be a possibility. Note that the compensable range and number of credits that may be compensated for students on Bachelors programmes is set out in 7.4.1-2 below, and that this differs for students on Integrated Masters programmes, as set out in 7.4.3b below.

UG 6.3.2 Where a student has undertaken a reassessment for a module and the module aggregation score after reassessment is an improvement on the original score, the reassessment score will count subject to a cap. For all modules delivered at FHEQ Level 5 or 6, this cap will be 9.0 aggregation points; otherwise the original aggregation score will stand. For all modules delivered at FHEQ Level 7 (that is, for an Integrated Masters programme), this cap will be 12.0. Regardless of programme type or level of study, the

resulting aggregation score will count towards the overall aggregation average used for degree classification.

UG 6.3.3 The normal expectation is that compensation will be applied immediately where consistent with the regulations without the need for reassessment. Where a student wishes to undertake reassessment in one or more failed modules, they may do so provided they apply within five working days of results being made available.

UG 6.4 GENERAL PRINCIPLES

UG 6.4.1 The precise form of reassessment is for the department to decide, but the following principles should be borne in mind:

a) the principal purpose of reassessment is to re-examine the learning objectives which have been failed at the first attempt;

b) students who have failed all elements of assessment at the first attempt should not be advantaged over those who have failed only a part of the assessment.

UG 6.4.2 Both Final and non-Final Year students will be given the opportunity to undertake reassessment within the same academic year in which they made their first attempt.

UG 6.4.3 Where reassessment is prohibited for reasons of professional accreditation this will be clearly stated in the assessment guidelines provided to students and alternative awards and other available options identified.

UG 6.4.4 Students may not seek reassessment to improve a passing grade unless required for professional accreditation and allowed under specific accreditation arrangements (see Appendix 5 of the Undergraduate Assessment Regulations for further details).

UG 6.4.5 When all the results of reassessment are available the overall profile will then be considered following procedures detailed below in the section on the consideration and confirmation of results.

UG 7 COMPENSATION[7]

UG 7.1 GENERAL RULES FOR COMPENSATION

UG 7.1.1 Compensation is the award of credit for a module that has been failed but that meets the compensation eligibility criteria. Where allowable and subject to the learning outcomes for the programme being met, compensation must be granted unless the Board of Examiners believes that there is good reason not to do so. Any such reason must be described and justified in the minutes of the Board of Examiners. The final decision will be taken by the body or officer with delegated authority from Senate.

UG 7.1.2 Where a student has failed a module, the Board of Examiners will apply compensation in accordance with the following criteria:

[7] For condonation at the Lancaster University Ghana and Lancaster University Leipzig campuses, please see the variations documents for Ghana MARP Variations and Leipzig MARP Variations

a) the module must not be designated as 'non-compensable' in the syllabus rules and on the programme map;

b) the student must have attempted all elements of assessment during the initial assessment attempt of the module;

c) the student must have achieved a marginal fail after any resits they are required to undertake, defined as:

(i) an aggregation score of between 7 and 9 for level 4, 5, and 6 modules;

(ii) a mark between 40.0% and 49.9% for level 7 modules (including those studied as part of an Integrated Masters programme).

d) According to the following limits:

UG (Bachelors degrees with Honours):

Level 3: no compensation available[8]

Level 4: up to 20 credits

Level 5: up to 20 credits

Level 6: up to 20 credits

UG (Integrated Masters) – a maximum total of 60 credits across all levels may be compensated:

Level 3: no compensation available

Level 4: up to 20 credits

Level 5: up to 20 credits

Level 6: up to 20 credits

Level 7: up to 20 credits

UG 7.1.3 A compensated module will appear with the grade 'CM'. Credit for the module will be awarded and will contribute to the student's progression and award. The best mark achieved for a compensated module will be included within the final award calculation in accordance with award classification regulations.

UG 7.1.4 For level 4, level 5 and level 6 (IM only) UG modules, compensation may only be applied after the reassessment opportunity has been taken.

UG 7.1.5 For level 6 (finalist) modules and level 7 modules, compensation may be applied following the initial assessment attempt. Where a student wishes to undertake

[8] Note that L3 study is only available on integrated foundation programmes. This is included in the Bachelors and Integrated Masters sections for completeness's sake.

reassessment in one or more failed modules, they may do so provided they apply within five working days of results being made available.

UG 7.1.6 In order to award a Pass Degree, Boards of Examiners should normally compensate an additional 40 credits to a total of 60 credits maximum at Level 5 and Level 6 combined, where the aggregation score for each compensated module is between 7-9. No module may be compensated with an aggregation score of less than 7.

UG 7.1.7 For the transitional years (26/27 and 27/28), for any cases where there is any question about what a specific candidate is eligible for, or which modules may be compensated, these cases should be referred as a matter of course to the Classification and Assessment Review Board (CARB), in line with the General Regulations, GR 2.7.9.

UG 7.2 EXCEPTIONS

UG 7.2.1 The phrase "should normally" in this section (UG 7) means that compensation, where allowable and subject to the learning outcomes for the programme being met, must be granted unless the examiners believe that there is good reason not to do so. Any such reason must be described and justified in the examination board minutes. The final decision will be taken by Senate.

UG 7.2.2 Where, for whatever reason, reassessment in years 2, 3 (and for IMs, year 4) is not available before the end of the academic year, the examination board may compensate credit even where the aggregation score is below the compensable threshold. For students not in their Final Year, where a student has failed more than 30 but not more than 45 credits, 15 credits may be set aside – normally this will be for the module with the lowest fail mark. The student may progress to the next year of study, and will undertake an additional 15 credits (uncapped) in that year.

UG 7.2.3 Where a mark of zero has been applied to the whole module as a penalty for academic malpractice with no opportunity for reassessment, the exam board shall ordinarily exceptionally compensate this mark provided that this does not lead to the student having more than the permitted number of compensated credits as specified in these regulations. Where such compensation would lead to the maximum number of compensated credits being exceeded, the mark shall remain uncompensated, and the board of examiners shall deal with the student accordingly.

UG 8 INCOMPLETE ASSESSMENT AND EXCEPTIONAL CIRCUMSTANCES

UG 8.1 For the purposes of these regulations 'exceptional circumstances' will mean properly evidenced and approved claims from students that demonstrate good cause as to why their performance and achievements have been adversely affected by means which have not been fully addressed through extension and other available assessment procedures.

UG 8.2 For the purposes of these regulations 'good cause' will mean illness or other relevant personal circumstances affecting a student and resulting in either the student's failure to attend an examination, or submit coursework at or by the due time, or otherwise satisfy the requirements of the scheme of assessment appropriate to their programme of studies; or, the student's performance in examination or other instrument of assessment being manifestly prejudiced.

UG 8.3 A chronic medical condition, for which due allowance has already been made, will not itself be considered a good cause although a short-term exacerbation of such a condition might be so judged.

UG 8.4 'Evidence' will mean a report descriptive of the medical condition or other adverse personal circumstances which are advanced by the student for consideration as amounting to good cause. Such a report should include a supporting statement from an appropriate person. Where the report refers to a medical condition of more than five days' duration the report must be completed by an appropriate medical practitioner who would be requested to comment on how the medical condition concerned would be likely (if this were the case) to have affected the student's ability to prepare for or carry out the assessment(s) in question.

UG 8.5 Where an incomplete assessment may be the result of good cause, it will be the responsibility of the student concerned to make the circumstances known to their department or equivalent body and to provide appropriate evidence. Notification later than forty-eight hours after the examination, or after the date at which submission of the work for assessment was due, will not normally be taken into account unless acceptable circumstances have prevented the student from notifying the department within this time.

UG 8.6 All departments or equivalent will have an Exceptional Circumstances Committee whose primary responsibility it is to consider claims of good cause for the programmes they administer. Any such claims would be subject to confirmation by the examining bodies at a later date. The Exceptional Circumstances Committee would be required to meet at least once per annum prior to the final Examining bodies, but might usefully meet to consider claims of good cause on a more frequent basis. The Exceptional Circumstances Committee will produce minutes of its meetings to be submitted to the appropriate examination body. Guidance on the management and operation of Exceptional Circumstances Committees can be found in the General Regulations for Assessment & Award.

UG 8.7 In considering claims of good cause:

a) the evidence provided by the student claiming good cause, and any relevant and available material submitted by them for assessment will be scrutinised;

b) fairness to the individual student claiming good cause must be balanced with fairness to other students and the integrity of the assessment as a whole;

c) in the event of the student having failed to attend an examination or examinations, or having failed to submit course material or other work for assessment at or by the due time, it will be determined whether the failure to attend or submit has been justified by good cause;

d) in the event of the student having submitted work for assessment by examination or otherwise, it will be determined whether such work has been manifestly prejudiced by good cause. If such prejudice is established the work affected will normally be deemed not to have been submitted.

UG 8.8 Where it is determined that the evidence presented does not support the student's claim that they were prevented by good cause from attending an examination or from

submitting work for assessment, the student will be awarded Grade N (an aggregation score of zero) for the assessment or assessments in question. Where work is submitted but the student makes a claim that it has been affected by good cause (or a late penalty is applied), and the evidence presented does not support the student's claim then their work will be assessed (or penalised) as though no claim of good cause had been received and the student's grade for the module will be calculated accordingly.

UG 8.9 In the event of incomplete assessment arising from good cause being established the student will normally be expected to complete their assessment by attending the examination at a subsequent session, or submitting outstanding work for assessment, if an opportunity to do so occurs within their period of study. In considering whether this requirement should apply, the desirability of the student's assessment being conducted in full should be balanced with the practical considerations and financial costs to the student and the University of providing a later completion date. Consideration should also be given to the student's other assessment commitments to ensure that they are not unreasonably burdened. In order to permit such completion:

a) a special sitting of an examination may be arranged, or the student will be required to attend for examination at a scheduled session; and/or

b) a date for completion of non-examination assessment will be set; as appropriate in the circumstances. In any such event, that sitting or submission will be regarded as the student's first attempt if the examination or assessment missed would itself have been their first attempt.

UG 8.10 Where it is determined that the evidence presented supports the student's claim that they were prevented by good cause from completing work for assessment on or by the due time and where no means of substituting an alternative assessment may be found, the assessment(s) in question will be excluded (without penalty) from the calculation of the module aggregation score(s) and the following regulations will apply.

a) The extent to which the student's total assessment has been completed will be determined as a percentage, taking into account the relative weights attributed to those assessments as published in the relevant approved assessment scheme.

b) Examining bodies will make an overall judgement of the student's work submitted for assessment, using as far as possible the standards and criteria applied in respect of the work of other students.

c) At module level where the student has:

(i) completed 33% or more of the total summative assessment required, the examining bodies can recommend an overall module result on the basis of work completed so long as that work is deemed to demonstrate attainment against substantial elements of the module's learning outcomes;

(ii) completed less than 33% of the work required for assessment, they will be regarded as not having completed sufficient assessment to be awarded a grade in the module. In such cases they should be given an opportunity to complete the missing work as a first attempt.

d) At programme level where the student has:

(i) completed 75% or more of the total work required for programme assessment, the Examining bodies will recommend an award or other outcome on the basis of the work completed;

(ii) completed at least 30% but less than 75% of the work required for assessment, an Aegrotat (unclassified honours) degree may be recommended if the completed portion is of honours standard, or, if the completed portion is not of honours standard, no award will be made;

(iii) completed less than 30% of the work required for assessment they will be regarded as not having completed sufficient assessment to be awarded a degree.

UG 8.11 Where examining bodies decide to recommend an Aegrotat (unclassified honours) degree, and this recommendation is approved by the Committee of Senate via the Classification and Assessment Review Board then the Aegrotat degree will be awarded forthwith and the student will be invited to attempt, within two years, to qualify for the award of a classified honours degree by completing examinations and/or other work, under conditions and at times specified by the examining bodies, and approved by the Committee of Senate via the Classification and Assessment Review Board. Students who:

a) undertake the further assessment specified, and who achieve the required level of attainment, will subsequently be awarded an appropriate classified honours degree;

b) attempt further assessment, but who fail to achieve the required level of attainment for the award of a classified honours degree, will retain the Aegrotat degree already awarded;

c) decline the invitation to attempt further assessment within two years, will retain the Aegrotat degree already awarded.

UG 9 CONSIDERATION AND CONFIRMATION OF RESULTS

UG 9.1 Senate has ultimate authority to determine all results of assessment leading to Lancaster University credit and awards. It exercises its authority to make final decisions as to granting of all credit-bearing University awards, primarily through the Committee of Senate with non-standard cases considered and recommended by the Classification and Assessment Review Board.

UG 9.2 The Committee of Senate provides:

a) formal confirmation (or not) of recommendations from Boards of Examiners for the award to individual students of a named degree (i.e. qualification and subject) of a particular class;

b) formal approval of recommendations from Boards of Examiners that students be awarded no degree with or without a further re-sit opportunity (i.e. Fails);

c) formal ratification of second year results (of courses finally assessed at the end of the second year) including the timing and nature of re-sit opportunities for failed elements.

Further procedural details are set out in the General Regulations for Assessment and Award.

UG 9.3 For each degree programme approved by the University there will be an Examination Board comprising external and internal examiners which will be responsible for the assurance of standards through the exercise of their academic judgement both directly in the assessment of students' work and indirectly in the design of specific forms of assessment. The constitution and terms of reference for examination bodies within the constituent elements of the University are set out in the section on examination boards in the General Regulations for Assessment & Award.

UG 9.4 The examination bodies will receive decisions from the Exceptional Circumstances Committee. Examination bodies cannot, of themselves, reconsider or change decisions of the Exceptional Circumstances Committee. Examination bodies may challenge decisions of Exceptional Circumstances Committees by referring final decisions to the Committee of Senate via the Classification and Assessment Review Board, or equivalent body.

UG 9.5 The Level 4 Board of Examiners will consider the results of examinations and final marks and make recommendations to the Committee of Senate as to whether students have qualified to proceed from Year 1 to Year 2 and to which degree programmes. Details of the role and operation of the Level 4 Examination Board can be found in the section on examination boards in the General Regulations for Assessment & Award.

UG 9.6 Boards of Examiners for the classifiable components of degrees will consider the results of examinations and final marks and make recommendations to the Committee of Senate with non-standard cases referred for consideration and recommendation via the Classification and Assessment Review Board as to the award of degrees (and the classes of degrees) within the approved degree programme classification scheme. Boards of Examiners also consider and confirm marks derived from all non-Final Year modules taken and examined in the academic year under consideration. Details of the role and operation of Boards of Examiners can be found in the section on examination boards in the General Regulations for Assessment & Award.

UG 9.7 The business of the examination boards will be minuted and the minutes will include a record of the External Examiner's adjudications, comments and recommendations, as well as particular decisions made by the Board. The minutes will also record the decisions of the Exceptional Circumstances Committee for each candidate considered by that committee (although detailed discussion of circumstances should not be undertaken at the Examination Board). The minutes must include a list of attendees (together with their status as external or internal examiners or assessor). This record of the proceedings of the board will be restricted and made available only to: the participating examiners and assessors; the Vice-Chancellor and other officers of the University as appropriate; the Committee of Senate and the Classification and Assessment Review Board; and appropriate Academic Appeal and Review Panels as defined in the chapter on Academic Appeals. Where the examination body has exercised its discretion in a particular case, as provided by these Regulations, the Committee of Senate via the Classification and Assessment Review Board will normally uphold its decision providing it had the support of the majority of the external examiners present at that examination board.

UG 10 PUBLISHED INFORMATION

UG 10.1 The determination of results and the classification of University degrees are subject always to ratification by the Committee of Senate and will be regarded as provisional until ratified.

UG 10.2 Immediately after the meetings of the relevant examining bodies, departments or equivalent may notify students of their provisional degree results.

UG 10.3 Within forty days of the ratification of degree results, students will be sent a transcript of their results together with a Higher Education Achievement Report, both of which will conform in scope and layout to principles agreed by Senate.

UG 10.4 After the ratification of results, all examination boards are to produce a "transparency report". This report is not expected to give detail at the individual student level, but instead provide information considered by the board when making decisions. This may include: average module marks; whether any scaling is undertaken (or proposed); module marks set aside at cohort level; any other contextual information specific to individual modules considered by the board.

UG 11 EXCLUSION

UG 11.1 Students who, after undertaking agreed reassessment opportunities, fail to meet the stipulated criteria for progression or final award will be excluded from the University. Students are entitled to appeal against exclusion under the University's Academic Appeals procedures.

APPENDIX 1: UNDERGRADUATE GRADING TABLE (LEVELS 4, 5 & 6)[9] [10]

Result	Broad descriptor	Grade	Aggregation score	Primary level descriptors for attainment of intended learning outcomes
Pass	Excellent	A^+ A A^-	24 21 18	Exemplary range and depth of attainment of intended learning outcomes, secured by discriminating command of a comprehensive range of relevant materials and analyses, and by deployment of considered judgement relating to key issues, concepts and procedures
Pass	Good	B^+ B B^-	17 16 15	Conclusive attainment of virtually all intended learning outcomes, clearly grounded on a close familiarity with a wide range of supporting evidence, constructively utilised to reveal appreciable depth of understanding
Pass	Satisfactory	C^+ C C^-	14 13 12	Clear attainment of most of the intended learning outcomes, some more securely grasped than others, resting on a circumscribed range of evidence and displaying a variable depth of understanding
Pass	Weak	D^+ D D^-	11 10 9	Acceptable attainment of intended learning outcomes, displaying a qualified familiarity with a minimally sufficient range of relevant materials, and a grasp of the analytical issues and concepts which is generally reasonable, albeit insecure
Fail	Marginal fail	F1	7	Attainment deficient in respect of specific intended learning outcomes, with mixed evidence as to the depth of knowledge and weak deployment of arguments or deficient manipulations
Fail	Fail	F2	4	Attainment of intended learning outcomes appreciably deficient in critical respects, lacking secure basis in relevant factual and analytical dimensions
Fail	Poor fail	F3	2	Attainment of intended learning outcomes appreciably deficient in respect of nearly all intended learning outcomes, with irrelevant use of materials and incomplete and flawed explanation
Fail	Very poor fail	F4	0	No convincing evidence of attainment of any intended learning outcomes, such treatment of the subject as is in evidence being directionless and fragmentary

Other transcript indicators		
Flag	Broad descriptor	Definition
M	Malpractice	Failure to comply, in the absence of good cause, with the published requirements of the course or programme; and/or a serious breach of regulations
N	Non-submission	Failure to submit assignment for assessment
P	Penalty	Failure to submit within regulation requirements (late submission, improper format, etc.)
R	Resit	Attainment of a passing grade through reassessment processes
RC	Resit Compensated	Resit mark falls within compensable range and has met criteria for compensation

[9] For marking of the Final Year (level 7) of the Integrated Masters programme, the Postgraduate Taught Assessment Regulations Percentage Table must be used.

[10] Note: For a grade to be awarded, students must also satisfy the primary level descriptors listed in the grades at all levels below that which is awarded (i.e. descriptors are to be read cumulatively up to and including the grade achieved).

APPENDIX 2: PERCENTAGE CONVERSION TABLE

(% to aggregation score)									
1 = 0.225	2 = 0.450	3 = 0.675	4 = 0.900	5 = 1.125	6 = 1.350	7 = 1.575	8 = 1.800	9 = 2.025	10 = 2.250
11 = 2.475	12 = 2.700	13 = 2.925	14 = 3.150	15 = 3.375	16 = 3.600	17 = 3.825	18 = 4.050	19 = 4.275	20 = 4.500
21 = 4.725	22 = 4.950	23 = 5.175	24 = 5.400	25 = 5.625	26 = 5.850	27 = 6.075	28 = 6.300	29 = 6.525	30 = 6.750
31 = 6.975	32 = 7.200	33 = 7.425	34 = 7.650	35 = 7.875	36 = 8.100	37 = 8.325	38 = 8.550	39 = 8.775	40 = 9.000
41 = 9.300	42 = 9.600	43 = 9.900	44 = 10.200	45 = 10.500	46 = 10.800	47 = 11.100	48 = 11.400	49 = 11.700	50 = 12.000
51 = 12.300	52 = 12.600	53 = 12.900	54 = 13.200	55 = 13.500	56 = 13.800	57 = 14.100	58 = 14.400	59 = 14.700	60 = 15.000
61 = 15.300	62 = 15.600	63 = 15.900	64 = 16.200	65 = 16.500	66 = 16.800	67 = 17.100	68 = 17.400	69 = 17.700	70 = 18.000
71 = 18.300	72 = 18.600	73 = 18.900	74 = 19.200	75 = 19.500	76 = 19.800	77 = 20.100	78 = 20.400	79 = 20.700	80 = 21.000
81 = 21.150	82 = 21.300	83 = 21.450	84 = 21.600	85 = 21.750	86 = 21.900	87 = 22.050	88 = 22.200	89 = 22.350	90 = 22.500
91 = 22.650	92 = 22.800	93 = 22.950	94 = 23.100	95 = 23.250	96 = 23.400	97 = 23.550	98 = 23.700	99 = 23.850	100 = 24.000

APPENDIX 3: GUIDANCE FOR SCALING OF MARKS

1. All assessments and marking schemes should be created with the aim of ensuring that the resulting grades/marks give a good indication of the ability and application of the students. However, it is inevitable that on occasion this will not work as planned.

2. Reasons may include a misprinted examination paper, the interruption of an examination or, in a science laboratory, an instrumental malfunction not obvious at the time of the experiment; or it may simply be that examiners agree, using their academic judgment and with the benefit of hindsight, that an assessment, or part of an assessment, proved to be significantly harder or easier than expected.

3. In such cases it is appropriate to consider whether the marks should be scaled. Scaling may be of the overall mark for the module or of any assessment therein.

4. Although an unusual distribution of grades/marks is not of itself a sufficient reason for scaling to be applied, it may be an indication that something has gone wrong. For this reason, if the overall mean aggregation score for any module lies outside the range:

   14.5-17.5 (or 58% to 68% for percentage marks)

   Then examiners must consider whether or not there is a case for the marks to be scaled.

   Note: For **International and Regional Teaching Partnership provision** the range outside which scaling must be considered is

   13.5-17.0 (or 55% to 66.7%)

5. Where the possibility of scaling is being discussed, the precise method should also be discussed and should reflect both the nature of the assessment and the size of the cohort. Both the reason for scaling and the method used must be justified within the minutes of the examining body. If scaling is discussed and not used, the reason for not scaling must be recorded in the minutes. In all cases both the original and the scaled marks must be permanently recorded.

6. Where scaling is applied for the same module for at least part of its assessment on more than one occasion, the assessment practices of the module must be reviewed as appropriate.

7. Scaling may take any form as long as it preserves the ordering of students' marks; thus, for example, if Student A has a higher unscaled mark than Student B, then Student A's scaled mark must not be lower than that of Student B. Common examples of scaling methods are given below, but other methods are possible.

   (a) For work marked in letter grades, all grades may be raised or lowered by a constant amount.

   (b) For work marked in percentages, every mark may be multiplied by a constant factor, or have a constant value added to or subtracted from it, or a combination of the two.

   (c) As in (a) or (b) above, except that where marks are being reduced no pass is turned into a fail (thus, for example, where marks are in general being reduced by 10%, for

an undergraduate module or assessment, all unscaled marks between 40% and 49% become scaled marks of 40%), or no compensable mark is turned into a non-compensable mark.

(d) For work marked in percentages, piecewise linear interpolation may be used, where each mark is plotted for each student against their average mark on other assessments, as in the graphs below.

APPENDIX 4: TRANSLATION OF GRADES FROM EXCHANGE PROGRAMMES

1. Departments will not attempt to re-examine work undertaken on exchange. Exchange grades will, in general, be taken as they stand as the basis of conversion. Exceptions may be made where there is some particular reason to think that an exchange grade is unsuitable for direct conversion; for example, in cases where Lancaster undergraduates take exchange postgraduate units.

2. Departments will ensure that all students returning from a year on exchange, and before they begin their Final Year at Lancaster, are given guidance on the standard of their exchange performance and the likely consequences for their overall degree classification.

3. Overseas grades will not be confirmed as Lancaster grades before the full results of the students' Lancaster-assessed units are available. For each student the Examination board will be presented with:

   (a) the grades for all exchange units;

   (b) preliminary recommendations as to the appropriate conversions of these grades into Lancaster marks where required;

   (c) any other evidence relating to the student's work in exchange which may be relevant to the final assessment decision?

4. It is the role of the Examination board either to confirm or to amend the conversions in the light of the evidence available.

5. Where students take more than the equivalent of four Lancaster units during the year on exchange, the first units to be set aside will be any which are in areas not directly related to the students' major or minor subject. After that procedure, the best units will be used. Where it is necessary to combine units, this will be done in whichever way is to the student's best advantage.

6. Where exchange partners mark using the same grading scale as Lancaster (A+ to F) marks will usually be used as is and not be translated. This includes most exchange arrangements with North America, Hong Kong, Singapore and New Zealand.

7. Where exchange partners do not mark using the same grading scale as Lancaster the grades will normally be translated using the tables contained in the Grade Translation Booklet, available from the Global Experiences Office.

   <u>For BSc International Business Management (*previously* BBA International Business Management)</u>

   Each BSc International Business Management partner marks on a points-based system. For each programme said points will be multiplied by such factors (including taking account of those partners which use a scale where lower points represent higher achievement) so as to give a Lancaster aggregation score out of twenty-four, taking due consideration of pass marks. This will then be recorded as the aggregation score for the course.

8. For new partner institutions which use a grading system different from Lancaster's the means for translating the grades will be determined as an element of institutional approval.

APPENDIX 5: ADDITIONAL REQUIREMENTS FOR PROFESSIONAL AWARDS

1. Certain awards within Lancaster University carry alongside the academic award professional accreditation from the Professional, Statutory or Regulatory Body (PSRB) associated with the academic discipline. In certain cases these PSRBs have the authority to set requirements above and beyond those required by Lancaster's regulations. These additional requirements are set out below.

YEAR 1

2. LLB Law degrees

2.1 LLB Law (Clinical Learning)

LLB Law (Clinical Learning) students are required to take all 120 Year 1 credits in their prescribed programme. In order to comply with PSRB regulations (and be eligible to qualify for accreditation) the pass mark for all Level 4 modules is 9.0. In order to progress from Year 1 to Year 2 on the LLB Law (Clinical Learning) programme students must pass at the first attempt and achieve a Level 4 aggregation score of 11.5. Students who do not progress under this rule will be transferred to the second year of the LLB Law programme provided they have met the progression requirements for this programme. Compensation is not permitted on the LLB Law (Clinical Learning) programme.

3. BA (Hons) Social Work

3.1 When progressing from Year 1 to Year 2, BA (Hons) Social Work students follow the standard progression rules as laid out in 4.2.1-4.2.7 above, except:

3.2 Students cannot progress to Level 5 study if they fail to pass all SWRK4001 assessment and all component parts of the module including any replacement work for missed skill development days.

4. BA (Hons) Architecture

4.1 The PSRB accrediting body for the programme is the Royal Institute of British Architects (RIBA).

4.2 In order to progress between each year of study on the BA (Hons) Architecture, and be awarded the degree, students must pass all modules, and any subcomponents of assessment that are mapped to RIBA criteria, at a minimum pass mark of 9.0. Compensation of modules is not available for this programme.

THE CLASSIFIABLE COMPONENTS OF A DEGREE

5. BEng and MEng (Integrated)

Clauses 5.1 through to 5.6 apply to all Engineering UG programmes (including study abroad, placement year and foundation year variants). Clauses 5.7a and 5.7b are included for previous cohorts, to detail the regulations in force at this point in time.

5.1 For the award of honours BEng or the award of an honours MEng degree, the major 40-credit project modules must not be compensated.

5.2 For the award of honours BEng degree, ENGR6003 must not be compensated.

5.3 For the award of an honours MEng degree, ENGR6003 and ENGR7003 must not be compensated.

5.4 For the award of honours BEng or the award of an honours MEng degree, no more than 30 credits can be compensated for the whole of the programme of study, including Level 4. Any compensation received on a Foundation Year programme variant at Level 3 is not included in the overall credit limit on compensation.

5.5 For the award of honours BEng or the award of an honours MEng degree, no module may be compensated with an aggregation score of less than 10 percentage points below the nominal pass mark. For Level 4, 5 and 6 modules with a pass mark of 9.0, no module may be compensated with a pass mark less than 7.0. For Level 7 modules with a pass mark of 50%, no module may be compensated with a pass mark less than 40%.

5.6 Component threshold rule (to be applied to ENGR5001):
In the scenario whereby component thresholds have been applied to a module, regardless of module average, if a student receives a score less than the component threshold for any component, they must undertake a reassessment for those failed components before progression to the next stage can be considered. If the score for each component after reassessment is an improvement on the original score, the reassessment score will count for that component subject to a cap at the component threshold level. If a component score is more than ten percentage points below the component threshold after reassessment, the module will be considered a fail. If a component score is between ten percentage points below the component threshold and the component threshold after reassessment, the module will be considered for compensation after review of the student's overall profile. Any compensation to any one element or more will be applied to the whole module, i.e. 20 credits.

5.7a ***This paragraph applies to students who entered full-time degrees between 2016-17 and 2019-20.***

For the award of an honours BEng or the award of an honours MEng degree, no more than 20 credits may be compensated in any level of study. In addition, where modules include two assessment modes (coursework and examination) that assess different learning outcomes, a pass threshold of 7.0 will be adopted for each mode that contributes more than 30% to the overall module mark.

5.7b ***This paragraph applies to students entering full-time degrees from 2020-21 to 2025-26.***

For the award of an honours BEng or the award of an honours MEng degree, no more than 20 credits may be compensated in any level of study, and no more than 30 credits may be compensated across the whole of Part II.

5.8 Students who do not fulfil the requirements of outlined above (either 26/27 entry or prior entries) but who nevertheless fulfil the University requirements for an undergraduate award will be awarded a BSc (Hons) Engineering Science. The BSc (Hons) Engineering Science is not accredited by any of the engineering institutions with which the Engineering department holds accreditation (IMechE, IET or IChemE).

6. BA/BSc (Hons) Psychology

6.1 Where a student has met the criteria for a BA/BSc, but not the criteria for a BPS-accredited degree due to lacking either:

I) a passed dissertation project (level 6 PLO1; PSYC6401), or

II) verbal or non-verbal communication (level 6 PLO 6) or

III) collaborative work (level 6 PLO 8).

A BA/BSc Psychological Studies, with either languages or linguistics if appropriate, will be awarded. The BA/BSc Psychological Studies is not accredited by the British Psychological Society.

7. BSc (Hons) Biomedical Science, BSc (Hons) Biomedical Science (Placement Year), BSc (Hons) Biomedical Science (Study Abroad), MSci (Hons) Biomedical Science and BSc (Hons) Biomedical Science (With Foundation Year) (Accredited by the Institute of Biomedical Science)

7.1 ***For students who entered the programme in 2024-25 or 2023-24 (on Placement programme)***: The classification will be calculated in accordance with standard regulations with the exception that all assessment elements must be passed in the seven modules focused on core Biomedical Disciplines (BIOL281: Clinical Biochemistry; BIOL282: Cellular Pathology; BIOL283: Haematology and Transfusion Science; BIOL243: Medical Microbiology; BIOS6101: Medical Genetics and Clinical Immunology; BIOS6102: Cancer Biology and Therapeutics; and BIOS6201: Pathobiology) and fail marks in any assessment element for any of these modules may not be compensated. In addition, fails in the Final Year BIOS6001: Biosciences Research Project module may not be compensated.

Students who have fails in coursework, test or exam elements for any of these modules after exhausting all resit opportunities will be eligible for transfer to BSc (Hons) Biomedicine or MSci (Hons) Biomedicine programmes provided they do not exceed the maximum number of compensated failed credits permissible in the standard regulations for progression to third or fourth year. The Biomedicine programmes, unlike the Biomedical Science programmes, will not be accredited by the Institute of Biomedical Science.

7.2 ***For students who entered the programme in 2025-26***: The classification will be calculated in accordance with standard regulations with the exception that all assessment elements must be passed in the six modules focused on core Biomedical Disciplines (BIOS5101: Clinical Biochemistry, Haematology and Transfusion Science; BIOS5102: Microbiology and Immunology; BIOS5201: Cellular Pathology and Medical Microbiology; BIOS6101: Medical Genetics and Clinical Immunology; BIOS6102: Cancer Biology and Therapeutics; and BIOS6201: Pathobiology) and fail marks in any assessment element for any of these modules may not be condoned. In addition, fails in the Final Year BIOS6001: Biosciences Research Project module may not be compensated.

Students who have fails in coursework, test or exam elements for any of these modules after exhausting all resit opportunities will be eligible for transfer to BSc (Hons) Biomedicine, BSc (Hons) Biomedicine (Study Abroad), or MSci (Hons) Biomedicine programmes provided they do not exceed the maximum number of compensated failed credits permissible in the standard regulations for progression to third or fourth year. The Biomedicine programmes,

unlike the Biomedical Science programmes, will not be accredited by the Institute of Biomedical Science.

7.3 ***For students who entered the programme from 2026-27 onwards***: The classification will be calculated in accordance with standard regulations with the exception that all assessment elements must be passed in the eight modules focused on core Biomedical Disciplines (BIOS4103: Anatomy and Physiology; BIOS4203: Fundamentals of Biomedical Science; BIOS5101: Clinical Biochemistry, Haematology and Transfusion Science; BIOS5102: Microbiology and Immunology; BIOS5201: Cellular Pathology and Medical Microbiology; BIOS6101: Medical Genetics and Clinical Immunology; BIOS6102: Cancer Biology and Therapeutics; and BIOS6201: Pathobiology) and fail marks in any assessment element for any of these modules may not be compensated. In addition, fails in the Final Year BIOS6001: Biosciences Research Project module may not be compensated.

Students who have fails in coursework, test or exam elements for any of these modules after exhausting all resit opportunities will be eligible for transfer to BSc (Hons) Biomedicine, BSc (Hons) Biomedicine (Study Abroad), or MSci (Hons) Biomedicine programmes provided they do not exceed the maximum number of compensated failed credits permissible in the standard regulations for progression to third or fourth year. The Biomedicine programmes, unlike the Biomedical Science programmes, will not be accredited by the Institute of Biomedical Science.

8. BA (Hons) Social Work

8.1 In addition to satisfying the conditions for the award of a degree, students must satisfy all the professional requirements of the scheme as laid down by Social Work England in order to be eligible to register with Social Work England. In order to satisfy Social Work England requirements students must, on the basis of pass/fail, pass each of the two placements in the classifiable years of a degree. In order to undertake these placements, students must have completed all scheduled Skill Development Days (SDDs) to the department's satisfaction, details of which are laid out in supporting programme information provided to all students.

<u>Examination Board</u>

8.2 BA (Hons) Social Work has an additional examination board, to be held after the completion of the first placement. The purpose of this board is to confirm suitability for continued registration on the programme, and may include discussion of candidates' Fitness to Practice. Failure at this board or any of the other end-of-year boards for BA (Hons) Social Work may result in Fitness to Practise concerns which could result in a Fitness to Practise hearing. The outcome of a Fitness to Practise hearing may be appealed as laid out in the Academic Appeals chapter.

<u>Aegrotat degree</u>

8.3 An Aegrotat degree cannot be awarded for the BA (Hons) Social Work.

9. Degrees in the School of Computing and Communications (Students must have studied at the Lancaster campus, as detailed on the transcript of study)**:**

BSc (Hons) Computer Science

BSc (Hons) Computer Science (Study Abroad)

BSc (Hons) Software Engineering

MSci (Hons) Computer Science (with Industrial Experience)

MSci (Hons) Software Engineering (with Industrial Experience)

9.1 BCS, The Chartered Institute for IT accredited degrees

9.1.1 For the award of honours BSc (Hons) Software Engineering, BSc (Hons) Software Engineering (Study Abroad), the modules SCCM5010 Software Engineering Studio I and SCCM6010 Software Engineering Studio II and SCCM6011 Software Engineering Studio III must be passed without compensation. A maximum of 30 credits in a BSc degree programme can be compensated. No compensation of module(s) delivering one or more AHEP learning outcome(s) is allowed if those outcome(s) are not met in other uncompensated module(s). Failure to meet these criteria will be awarded the alternative degree title of BSc Software Systems/BSc Software Systems (Study Abroad) where they fulfil the requirements of the award, which is not BCS accredited.

9.1.2 For the award of honours BSc (Hons) Computer Science, BSc (Hons) Computer Science (Study Abroad), the modules SCCM5001 (Computer Science Group Project) and SCCM6001 Third Year Project (Computer Science) must be passed without compensation. A maximum of 30 credits in a BSc degree programme can be compensated. No compensation of module(s) delivering one or more AHEP learning outcome(s) is allowed if those outcome(s) are not met in other uncompensated module(s). Failure to meet these criteria will be awarded the alternative degree title of BSc Computer Systems/BSc Computer Systems (Study Abroad) where they fulfil the requirements of the award, which is not BCS accredited.

10. LLB Law degrees

10.1 LLB Law (Clinical Learning)

In order to progress from Year 2 to Year 3 on the LLB Law (Clinical Learning) programme, students must pass at the first attempt and achieve a Year 2 aggregation score of 13.5. Students who do not progress under this rule will be transferred to the LLB Law programme provided they have met the progression requirements for this programme. Compensation is not permitted on the LLB Law (Clinical Learning) programme.

11. BSc (Hons) Chemistry, BSc (Hons) Chemistry (Study Abroad), MChem (Hons) Chemistry, MChem (Hons) Chemistry (Study Abroad), MChem (Hons) Chemistry (with Industrial Placement)

11.1 For the award of a BSc (Hons) Chemistry, students must pass all the modules CHEM4061, CHEM5061, CHEM5062, CHEM6061, CHEM6071. These modules cannot be compensated. Students who fail to pass one or more of these modules, but who otherwise following LU regulations are eligible for the award of a degree, shall instead be awarded a BSc in Chemical Sciences (at the end of L6).

11.2 For the award of a MChem (Hons) Chemistry (or variant), students must pass all the modules CHEM4061, CHEM5061, CHEM5062, CHEM6061, CHEM6071, CHEM7071. These modules cannot be compensated. Students who fail to pass one or more of these modules, but who otherwise following LU regulations are eligible for the award of a degree, shall instead be

awarded a BSc in Chemical Sciences (at the end of L6), or an MSci in Chemical Sciences (at the end of L7) as appropriate.

11.3 Students who do not progress to Year 4 of the MChem (Hons) Chemistry (or variant) will be eligible for the exit award of the BSc (Hons) Chemistry, provided they have met the requirements to successfully complete Year 3.

11.4 Students who fail Year 4 after exhausting all resit opportunities will be eligible for the exit award of the BSc (Hons) Chemistry.

12. BA (Hons) Architecture

12.1 The PSRB accrediting body for the programme is the Royal Institute of British Architects (RIBA).

12.2 In order to progress from Year 2 to Year 3 on the BA (Hons) Architecture, students must pass all modules and subcomponents of assessment at a minimum pass mark of 9.0. Compensation of modules is not available for this programme.

APPENDIX 6: MODULE COMBINATIONS FOR CONDONATION PURPOSES

Note: this appendix only applies to students who were in their second year of study in the 2025-26 academic year or earlier.

1. Previously, where a programme separately assessed modules with a credit value of 15 or less, for specified undergraduate programmes these could be combined to a maximum size of 30 credits for the consideration of condonation. The previously approved combinations are included below. Where there are any queries about novel combinations not already approved by Academic Standards & Quality Committee, please contact the Chair of ASQC in the first instance.

Previously approved combinations were as follows:

2. Department of Mathematics and Statistics

2.1 Programmes

2.1.1 The available module combinations for the purposes of condonation listed below are applicable to the following programmes of study:

- BSc (Hons) Accounting, Finance and Mathematics
- BSc (Hons) Accounting, Finance and Mathematics (Industry)
- BSc (Hons) Computer Science and Mathematics
- MSci (Hons) Computer Science and Mathematics
- BSc (Hons) Economics and Mathematics
- BSc (Hons) Financial Mathematics
- MSci (Hons)Financial Mathematics
- BSc (Hons) Financial Mathematics (Industry)
- BA (Hons) French Studies and Mathematics
- BA (Hons) German Studies and Mathematics
- BSc (Hons) Management Mathematics
- BSc (Hons) Management Mathematics (Industry)
- BSc (Hons) Mathematics
- MSci (Hons Mathematics
- MSci (Hons)Mathematics (Study Abroad)
- BA (Hons) Mathematics and Philosophy

- BSc (Hons) Mathematics with Statistics
- BSc (Hons) Mathematics with Statistics (Placement Year)
- MSci (Hons) Mathematics with Statistics
- MSci (Hons) Mathematics with Statistics (Study Abroad)
- BSc (Hons) Mathematics, Operational Research, Statistics and Economics (MORSE)
- BSc (Hons) Mathematics, Operational Research, Statistics and Economics (MORSE) (Industry)
- BSc (Hons) Natural Sciences
- BSc (Hons) Natural Sciences (Study Abroad)
- BSc (Hons) Natural Sciences
- BSc (Hons) Natural Sciences (Study Abroad)
- BA (Hons) Spanish Studies and Mathematics
- BSc (Hons) Theoretical Physics with Mathematics
- MSci (Hons) Theoretical Physics with Mathematics
- MSci (Hons) Theoretical Physics with Mathematics (Study Abroad)

2.2 At Part II, any combination of modules is permissible within the same year and level of study to a maximum of 60 credits.

3. Department of Physics

3.1 Information on the grouped module options for the purposes of condonation can be found on the ASK Portal for Physics students, accessible here: ASK Portal.

APPENDIX 7: RECONCILIATION OF CEFR AND FHEQ FOR LANGUAGES MODULES

1. Included below is a table mapping relevant LU Language modules to the Common European Framework of Reference for Languages (CEFR), and how this aligns with the UK Framework for Higher Education Qualifications (FHEQ). The final column indicates where in their degree this module is available to students.

LU Languages Module (mnemonic FREN / SPAN / GERM / CHIN / ITAL as relevant)	**CEFR level in approved module documentation**	**Recommended FHEQ mapping for internal records**	**Module available to students studying in**
0001	A1	L4	Any programme at L4, L5, L6 where home programme structure and syllabus rules allow
0002	A2	L4	Any programme at L4, L5, L6 where home programme structure and syllabus rules allow
0003	A2/B1	L4	Any programme at L4, L5, L6 where home programme structure and syllabus rules allow
0004	B1/B2	L6	Any programme at L4, L5, L6
0005	B2	L6	Any programme at L4, L5, L6
0006	B2+	L6	Any programme at L4, L5, L6
LAGC0007 (Discovery Placement)	B2	L6	SH (and JH if added in future) languages programmes, in L6
LAGC0008 (Global Engagement Year)	B2/C1	L6	SH and JH languages programmes in their third year of study
0009	C1/C2	L6	SH and JH languages programmes, in L6
0010	C2	L6	SH and JH languages programmes, in L6

APPENDIX 8: DETAIL OF IN-YEAR CHANGES MADE TO CHAPTER

Version	Date of change	Detail of change & section(s) altered	Approval of change
1.1	30/09/2026	Typo in UG 4.2.4 corrected; clarificatory text added to UG 4.2.1 to remind reader of PSRB appendix; clarification made to Appendix 5, 4.2 re. progression and completion of award; accessibility updates to alt. text on title page.	N/a – admin
